CURRENT POSITION

Since October 2008 I work at AZTI Marine Research (Pasaia, Spain) as researcher in physical oceanography, I am presently the head of the Operational Oceanography group. My work is mainly focused on the Bay of Biscay shelf-slope circulation and mesoscale activity. My current research is based on different source in-situ and remote sensing data and on high frequency observations of ocean surface currents from HF radar. I have contributed to the development and implementation of the Operational Oceanography system of the Basque Country (EuskOOS) and I am leading the development of the Bay of Biscay Integrational Regional Site in the framework of JERICO-S3 H2020 project. I have authored/co-authored >70 peer-reviewed papers (H-22 Web of Science), authored/co-authored numerous contributions to international conferences, supervised 3 successful PhDs (1 ongoing), 7 successful MSc candidates, participated in >9 PhD committees and to the review of several scientific projects, articles and book chapters. I have participated in several European projects, as JERICO-NEXT, INCREASE, COMBAT, IBISAR, EUROSEA, FORCOAST (Leader of WP2 - User's engagement), MYCOAST and LIFE-LEMA. Currently, I am mostly involved in the projects OSTREOBILA, PASAIA SMART BAY-OARSOALDEA BLUE HUB, LAMARCA, CMEMS-IN Situ TAC-phase II, and JERICO-s3 (leading WP1 on the Scientific Strategy) and tasks related to operational oceanography and HF radar technology and its applications. including, the monitoring and forecast of marine litter hotspots. I am involved in European and international networking initiatives (Member of EuroGOOS HFR Task Team, the EuroGOOS Coastal Working Group and ICES WG00FE).
